Great Leadership Skills Are NOT Inherent, But CAN Be Learned!

As a Project Manager it is imperative that you create and maintain open lines of communication with your team members. Being able to understand them and understand what motivates them will ensure your success, the success of your team, and the success of your projects. Successful leaders find themselves receiving the recognition, praise and advancement they deserve.

James T. Brown Ph.D., president of SEBA® Solutions Inc., a Registered Education Provider for the Project Management Institute, has provided training for dozens of companies nationally and internationally. He has sixteen years of NASA experience that includes "hands on" experience as a team member, project manager and serving in executive level organizational leadership roles.

James is the author of [The Handbook of Program Management](#) published by McGraw-Hill. He has been published in *PM Network*, *PE Magazine*, *Projects@Work*, *PMI Community Post* and *PM World Today*. A recognized authority in project management, he is a frequently invited keynote speaker on project management areas of interest and leadership.

Dr. Brown has a patent for a project scheduling methodology, he has received numerous awards and is a recipient of the "NASA Public Service Medal" for exceptional contributions to NASA's mission. James has a Ph.D. in Industrial Engineering, a MS in Engineering Management and a BS in Electrical Engineering. He is a licensed Professional Engineer (PE), a certified Project Management Professional (PMP) and Certified Speaking Professional (CSP).

This course provides participants with leadership skills to successfully navigate all the challenges in a demanding project environment. As a result of this training you will be able to...

- Identify the traits of successful leaders and emulate those characteristics
- Build a strong team
- Establish Consensus
- Recognize the importance of being an observer and learner of human behavior
- Understand the importance of relationship building to achieving project success
- Appreciate what motivates different individuals within teams
- Conduct effective meetings
- Engage team members to resolve issues
- Use communication for maximum influence
- Establish processes to communicate effectively
- Know the different types of power leaders can use
- Appreciate what motivates different individuals within project teams
- Establish escalation strategies to facilitate resolution of complex problems
- Tactfully deal with stakeholders on sensitive issues
- Lead a project to successful completion

"Dynamic presenter, very informative, key leadership information for implementation in project management that I can apply immediately. Very insightful & worthwhile. Can be practically applied to my work scenarios."

R. Bergman, ADT Security Systems, Inc.

"Excellent class. The class encompasses leadership skills along with principles and practices that I can immediately execute to further develop my project management skills."

H. Chin, Assurant
