This course provides an overview of project risk management techniques. Participants identify project risks and manage those risks throughout the project life cycle. Specific emphasis will be placed throughout the course with having a proactive mindset with response to risk for effective project management.

After completion of this course you'll be able to:

- Define risk management
- Understand the advantages of risk management as a process
- Identify all project risks in a team environment
- Write effective risk statements
- Perform qualitative risk analysis for project risks
- Develop the criteria for a qualitative risk matrix
- Perform quantitative risk analysis for project risks
- Use three point estimates to characterize costs and schedule risks
- Perform expected value calculations
- Select quantitative or qualitative risk analysis based on the +’s and -’s of each method
- Generate risk response plans
- Screen and prioritize risks
- Communicate Risks to project stakeholders to maximize customer satisfaction
- Explain how our “risk attitudes” affects how we manage risks
- Understand the importance of updating risk plans
- Recognize that risk monitoring and control is an ongoing process

“This was a great use of time! Dr. Brown is a wonderful speaker who adds life and color to subject matter that could easily be flat and dry. His use of humor makes all the difference.” C. Murray, McAfee

“Dr. Brown simplifies a complex topic and gives actionable methods to implement these concepts.”
H. Ober, Pepsico

About James ...

James T. Brown Ph.D., is president of SEBA® Solutions Inc., a Registered Education Provider for the Project Management Institute. He is the author of *The Handbook of Program Management* published by McGraw-Hill.
